

The election solution is designed specifically for each client.

The need to elect a Board of Directors or similar group of leaders occurs on a regular but infrequent basis in any organisation including:

- ▶ **Academic institutions**
- ▶ **Associations**
- ▶ **Clubs**
- ▶ **Credit unions**
- ▶ **Student councils**
- ▶ **Universities**

An election is a rare event for most organisations and because of its occasional nature, many groups look outside their own resources for the expertise

needed to hold an election. SecureVote has extensive experience in conducting elections and understands that the key components of a successful election are:

- ▶ **a completely secure environment which produces an election result that will withstand the closest scrutiny**
- ▶ **compliance with the organisation's constitution and election rules**
- ▶ **convenience for the voter to maximise participation**
- ▶ **timely declaration of a result**

SecureVote Election Services

SecureVote has assisted many clubs, associations, unions and universities with their elections. The election solution is designed specifically for each client and is dependant upon their particular situation, the rules specified in the constitution and requirements of their voters:

- ▶ **incorporation of an appropriate level of security for each stage of the voting process**
- ▶ **provision of one or more voting channels**
 - **traditional paper based voting**
 - attendance
 - postal
 - **electronic voting**
 - telephone
 - Internet
- ▶ **third party certification of results**
- ▶ **design, production and distribution of voting literature**
- ▶ **compilation and analysis of results**

Appointing the first Board for national consortium

The Voting Challenge

mNet Corporation is a consortium of 20 organisations with both public and private sector interests. It was formed to develop a leading edge environment for research into wireless Internet applications. The new consortium needed to elect a Board of Directors from its 20 shareholder organisations.

The SecureVote Solution

SecureVote undertook to plan and manage the election within a very compressed deadline of ten days. The voting took place over the Internet to encourage full participation and to promote individual decision making which can be compromised if voting takes place in a meeting situation.

The Business Benefit

Almost all of the shareholders in the consortium voted in the election. mNet was particularly impressed with SecureVote's ability to implement the project rapidly and efficiently. It was important that the process was open, transparent and able to withstand scrutiny from the many parties involved. SecureVote was able to provide third party independence and a process which was unquestionably secure.
